1) Value given as electric gross power at the connector block of the alternator.

2) Calculated with net electrical power.

3) Variable heating water pump and return increase integrated ready for operation. 2nd row: incl. external condensing heat recovery, values for 30 °C return temperature.

4) Variable heating water pump and return increase integrated ready for operation, system separation heating water. 2nd row: internal condensing heat recovery, values for 30 °C return temperature.

5) Power values apply to 40 °C mixture cooler return temperature. Heating power values include the mixture intercooler heat.

For sufficient detonation resistance, a minimum methane number MZ ≥ 34 must be guaranteed, i.e. the propane content in the petroleum gas must be more than 98 %!

Scope of delivery: CHP unit consisting of gas engine and alternator, connected by an elastic coupling and a rigid flange, cooling water and exhaust heat exchanger, cooling water pump, safety gas regulation unit, oil supply tank, oil refilling unit with level monitoring etc. with complete internal pipework, for operation in heating water systems at 90/70 °C flow/return temperatures (special equipment at 95/80 °C e.g. for operation with absorption chiller on request), mounted ready for installation in a sound-absorbing canopy. Integrated switchgear cabinet with control and power section for fully automatic operation including mains monitoring with protection devices according to German guideline VDE AR-N 4105:2018 (< 100 kWel.) resp. AR-N 4110:2018 (>= 100 kWel.), fully wired. Pollutant reduction by catalyst and lambda-regulation according to the German BlmSchG § 22, optional version for 44. BlmSchV. Filled with lubricating oil and anticorrosive. Test run followed by first servicing is performed in factory prior to delivery. For further details see technical descriptions.

All specifications are standard values and subject to change.

Versions for natural gas application (also bivalent) on demand. Also see separate delivery chart for CHP units driven by sewage gas or biogas.
